**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

GROUP I. Claims 1-35 and 49, drawn to testing VoIP by executing test algorithm and determining quality of the VoIP network, classified in **class 370 subclass 352**.

GROUP II. Claims 36-48 and 50-55, drawn to communicating device, communicating over power line communication VoIP network and power line modem. Classified in **class 370 subclass 230 and/or 412**.

2. The inventions are distinct, each from the other because of the following reasons:  
Inventions Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combination (MPEP § 806.05 (c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because both combinations have different mode of operations different functions and effects. The subcombination has Separate utility such as communicating over power line communication VoIP network and power line modem.

Art Unit: 2616

3. Applicant is required under 35 USC 121 to elect a single disclosed Group for prosecution on the merits to which the claims shall be restricted. No generic claim is held to be allowable.

4. There is an examination and search burden for these patentably distinct groups due to their mutually exclusive characteristics. These groups require different field of search and/or the prior art applicable to one group would not likely be applicable to another group.

5. Applicant is advised that the reply to this requirement to be complete must include (1) an election of a group to be examined even though the requirement may be traversed (37 CFR 1.143) and (2) identification of the claims encompassing the elected group, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

6. The election must be made without traverse in order to preserve a right to petition.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Afsar M. Qureshi whose telephone number is (571) 272 3178.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Field Lynn can be reached on (571) 272 2092. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
